Content

Your presentation is a visual complement to your speech — you don't need to write everything out. Too much text looks cluttered and causes your audience to lose interest. Keep it simple and concise.

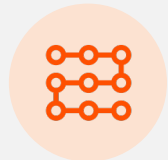

3 Key Aspects

Organization

Simple

With a clear and logical flow

Storytelling

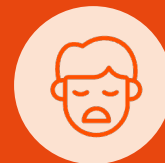

Quantity

No more than 4 key points per slide

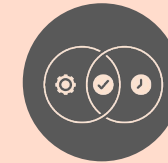

Six to eight words per point

Too much information overwhelms your audience

Quality

Information should be:

Relevant

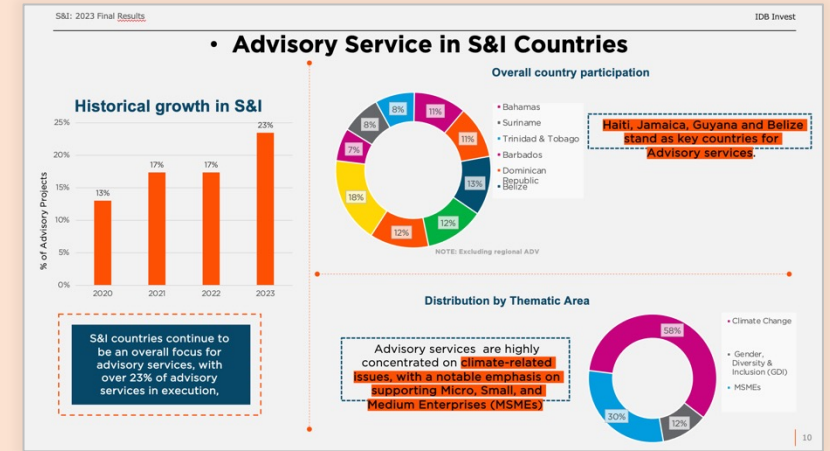

Accurate

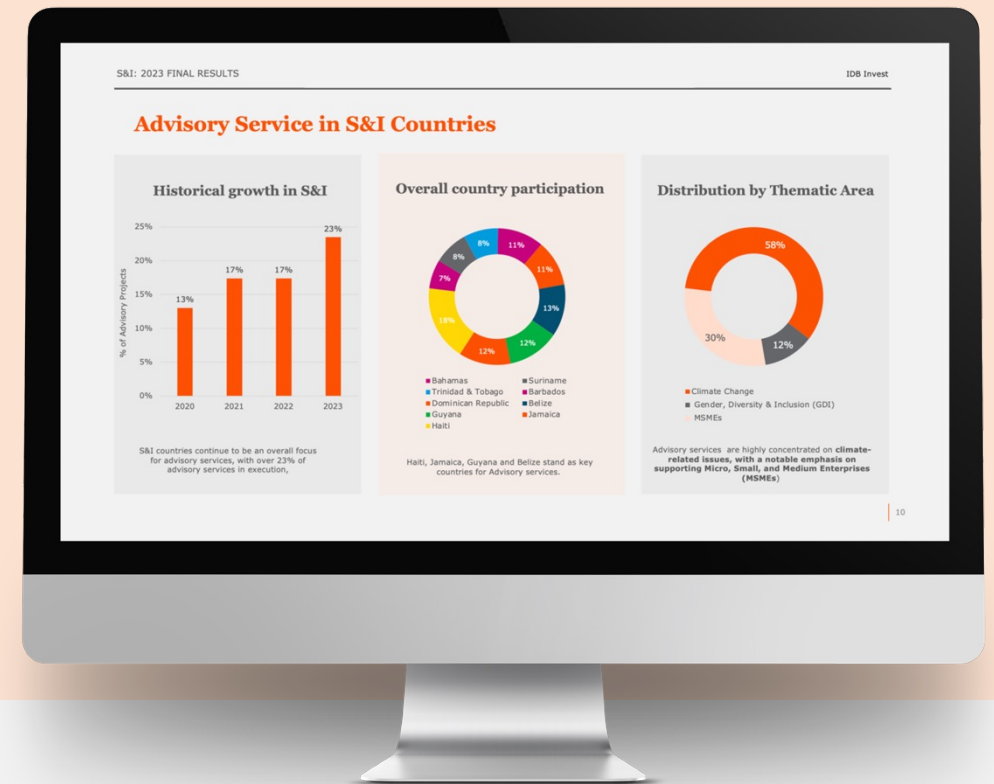

Appropriate

Example: an overloaded slide vs. a good one

Too many colors and too much information — no clear structure.

Uses 3 of the 4 template columns, with organized content and the approved color palette.

Tips

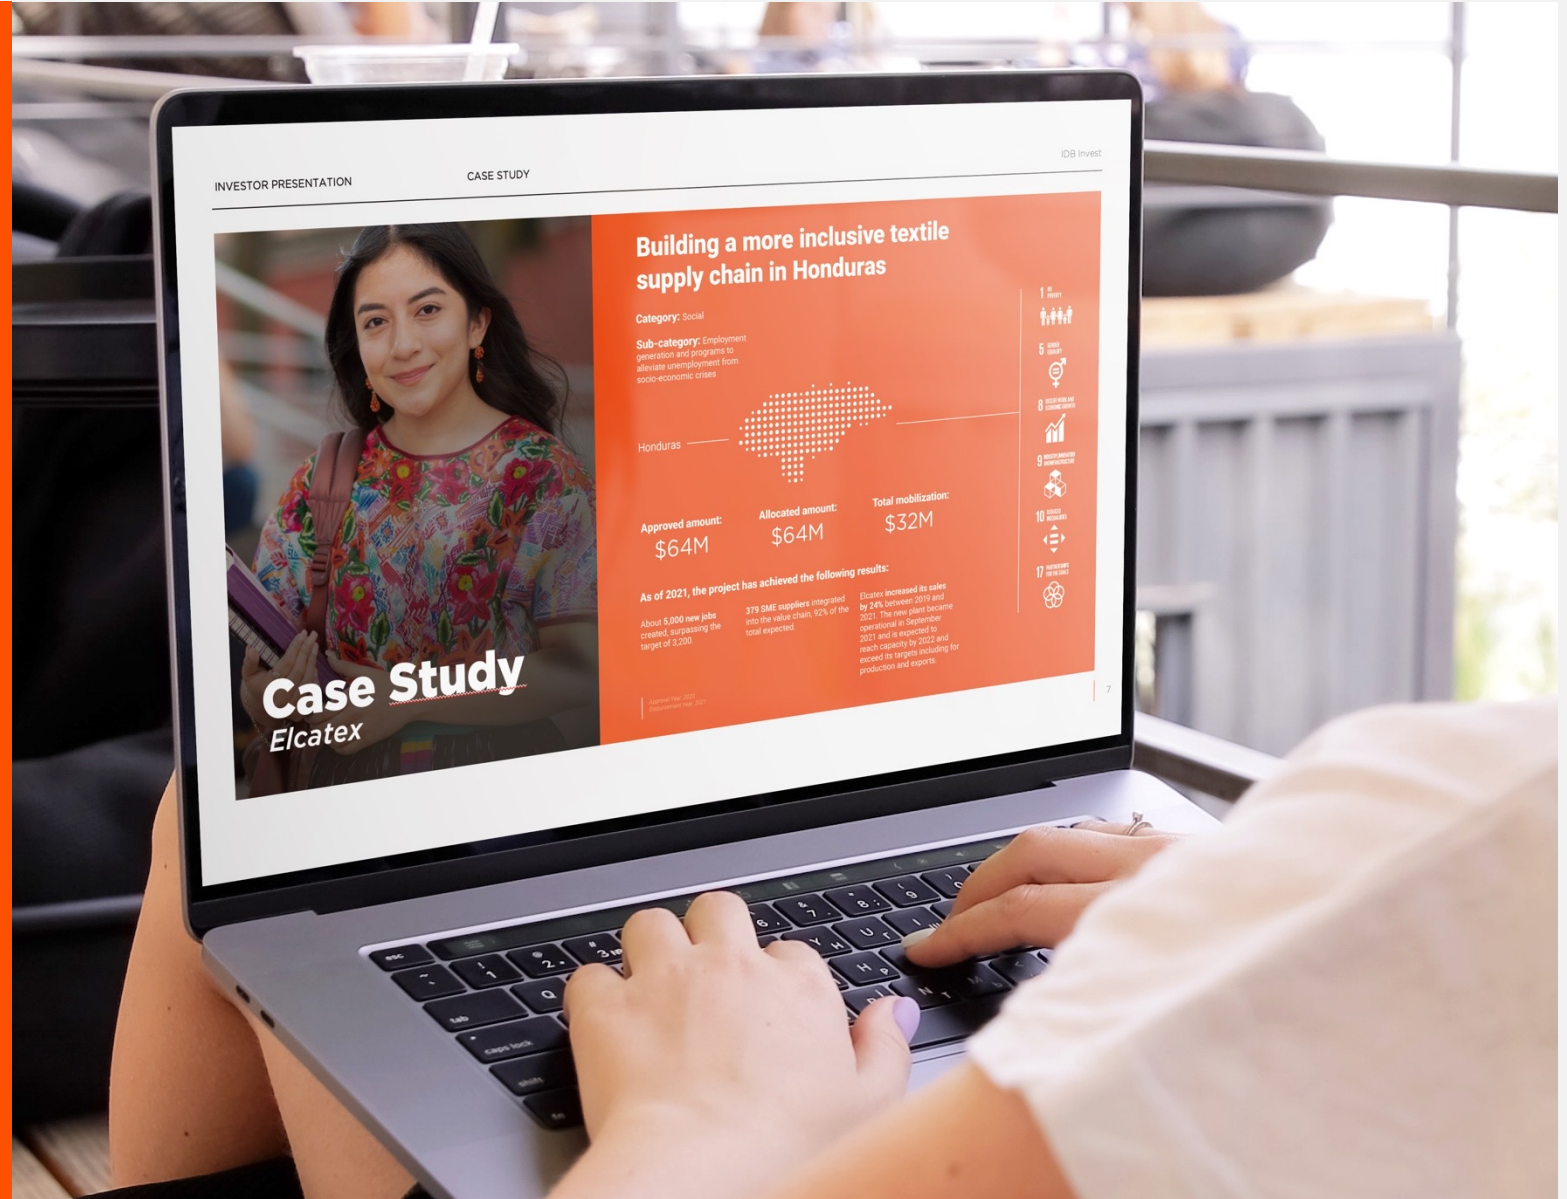

- **USE VISUAL SUPPORT ELEMENTS.**
These can be photos, charts, icons, maps, or diagrams — whatever best represents your content.

- If you have extra details, include source links so your audience can explore further.

Design

Create a clean, attractive visual design that supports your content without distracting the audience.

1. Keep it visually consistent:

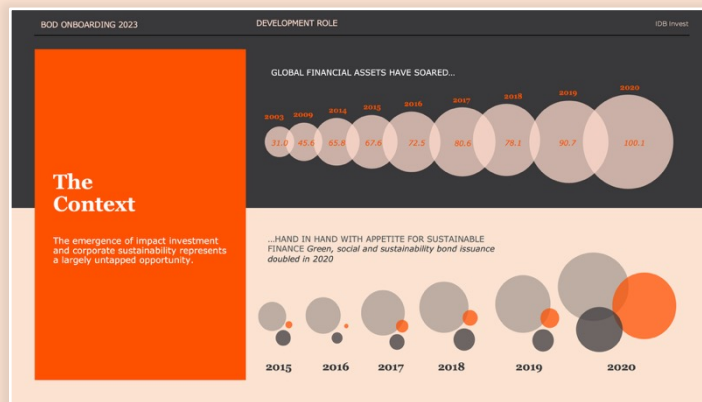

Use a consistent color palette and choose readable fonts. Keep a uniform style across all slides to give your presentation a cohesive look.

2. Use images and graphics:

Visuals like images, charts, and diagrams make your content easier to understand and remember. Choose them to support and reinforce your message.

3. White space:

Don't be afraid of empty space. It draws attention to what matters most and keeps your slide from feeling cluttered.

5. Use animations carefully:

Animations should be subtle and used sparingly. Overdoing them can distract from your message and look unprofessional.

6. Accessibility:

Make sure your visuals are accessible to all — use sufficient contrast for people with vision impairments, and add captions to any videos.
